FAVOURITE TRAIL Mundaring! Can I say that??

MOUNTAIN BIKE GOALS FOR 2017 AND BEYOND

My goals are to participate as many races as possible, trying to build up back the fitness and confidence and why not, move to the elite category next year and gets some point for the EWS!!! (that's a dream)

WHEN AND WHY DID YOU START MOUNTAIN BIKING?

I started mountain biking back in the 2005. I was 17, and along with a friend of mine we decided to buy a "street bike" to go around at night time in the city of Rome where I am from, and hit some local steps and drops! Suddenly we met other people that were doing basically the same, and they invited us to hit some tracks on the hills in the country side! That's when the love for the two wheels seriously started. In no time I managed to purchase a downhill bike and I started straight away to race. I travelled all around Italy and Europe to race in the Italian downhill series and a few IXS cup races. My best result as a pro was 9th at the Italian Championship in 2011. During those beautiful years of racing I had also the chance to participate to a couple of SuperEnduro races.

Finale Ligure, 2012

In 2012 I injured both my collarbone and a few ribs on a dirt bike during pre season training, so I decided not to race to recovery as best as possible and for different reasons I never started again!! But as we all know the love for the 2 wheels never ends!!! I moved to Australia in 2014 and in winter 2016 I purchased from the local shop Wembley Cycles my "Stumpy". I started again to train and this year I'm doing the WAGE series.
